PROFILE

Self-driven fresher with technical skills in Python, C, C++, SQL, and front-end web technologies. Built hands-on academic projects that strengthened my problem-solving and application-building abilities. Eager to gain industry experience and grow in a professional environment as an intern or entry-level developer.

EDUCATION

B.Sc (MSCs), *Vignana Jyothi Institute Arts and Science*   2023 – Present
Hyderabad, India

KEY SKILLS

- Python
- Excel & Power BI
- Data Visualization
- C,C++
- Web Development
- SQL
- Problem-Solving
- HTML, CSS
- DBMS
- UI/UX

PROJECTS

WeatherIQ: Intelligent Weather Insight Platform, *HTML | CSS | JavaScript | OpenWeatherMap API*
- Developed a dynamic weather application providing real-time temperature, humidity, and wind speed updates using the OpenWeatherMap API.
- Implemented dynamic background images showcasing famous landmarks corresponding to searched cities, enhancing user experience.
- Included a sidebar highlighting popular local food items and the best visiting time for each location based on climate data.
- Built the front-end using HTML, CSS, and JavaScript, demonstrating skills in API integration, responsive design, and interactive UI/UX.
- Successfully integrated asynchronous JavaScript (fetch API) for smooth, real-time data fetching and display.

Sweet Delight – Bakery Ordering App, *Bakery Ordering System Developed Using Adalo*
- Developed **Sweet Delight**, a bakery ordering application enabling users to browse and book cakes, pastries, donuts, and other bakery items.
- Built the complete application using **Adalo**, a no-code platform, showcasing skills in UI/UX design and workflow automation.
- Implemented key features such as product categories, item details, order placement, user authentication, and order history.
- Designed clean, responsive screens ensuring a smooth and intuitive ordering experience.
- Identified and troubleshooted a runtime issue where the app faced loading problems on the Adalo web deployment.
- Structured the database, collections, and navigation flows to maintain efficient user interaction and product management.

CERTIFICATES

- - SQL Advanced 🔗
- - Google Data Analytics Professional 🔗
- Oracle AI Foundations 🔗
